SKECHERS

Easy to put on without hands. Can use hook in the back to pull shoes up with clothing stick.
A lot of different styles and comes in wide fit.

Billy's Shoes: [BILLY Footwear | Fashion and Function For All](#)

These are designed to be used with AFOs. The zipper opens the whole shoe, so you can put your foot in without having to slide it in. A lot of different styles available and comes in wide fit as well. Cheaper on Amazon, but not all styles are available.

A simple search on Amazon for 'Women's adaptive shoes' will give you a great selection of shoes. These are Gmedonm shoes and they open up completely so you can put your foot in, and have Velcro closure, which is easy to open and close.
